

Summary of CEMARS[®] certification:

VIÑA J. BOUCHON

“Viña J. Bouchon S.A and Sociedad Agricola Chicureo Limitada (trading as Viña J. Bouchon) meets the requirements of the CEMARS[™] certification having measured its greenhouse gas emissions in compliance with the requirements of ISO 14064-1:2006 and committed to managing and reducing its emissions in respect of its organisation including: Mingre Winery, Mingre Vineyard, Batuco Vineyard, Cañadillas Vineyard, Las Mercedes Vineyard, Santa Rosa Vineyard and Santiago Office”

Introduction¹ – The family tradition of J. Bouchon dates back to 1982 when Emilie Bouchon comes from Bordeaux, France and settled in the Maule Valley south of Santiago de Chile.

The peculiar weather of the area and experience of their vines result in a high quality wine with deep colour and intense aromas.

Their winery located in Santa Maria of Mingren has a capacity of about 4 million gallons, has an isothermal plant where there are administrative warehouses, laboratories and bottling line.

Currently Viña J. Bouchon’s wines are distributed and tasting by discerning costumers from Asia, North America and Europe.

Aware of environmental problems J. Bouchon has been proposed work by environment being efficient in the raw material use and reduced their activity's impacts.

J. Bouchon winery has been lined with the Chilean wine sector’s agenda about environmental care and the commitment of calculated and reduce the GHG emissions, adopting the Carbon Footprint indicator like a management and information tool, with the target to advance at the possible exigencies from countries that has begun their emissions account and management.

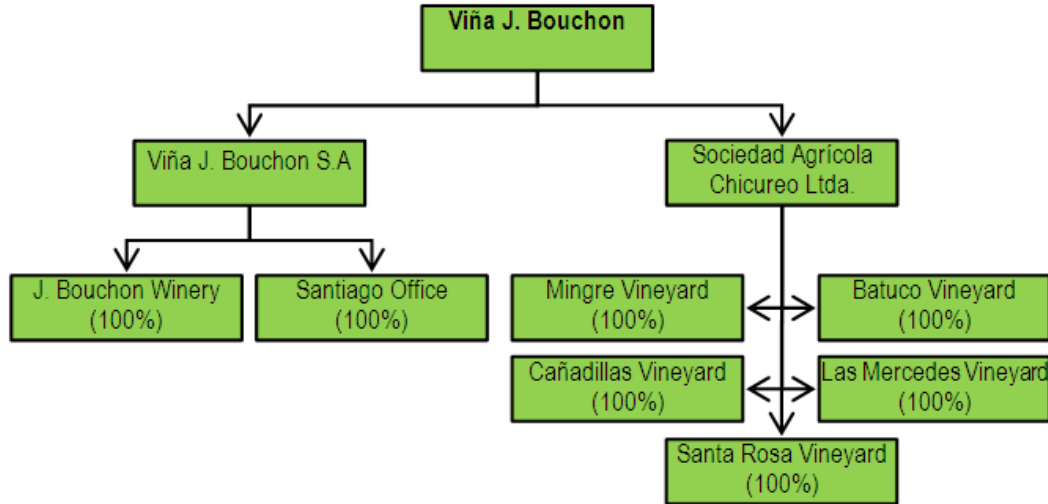

Boundary – The diagram below shows the organisational structure used for describing Viña J. Bouchon’s greenhouse gas (GHG) emissions inventory, and what business units were included in the CEMARS[®] certification. Yellow business units were excluded from the certification.

Summary of CEMARS® certification:

VIÑA J. BOUCHON

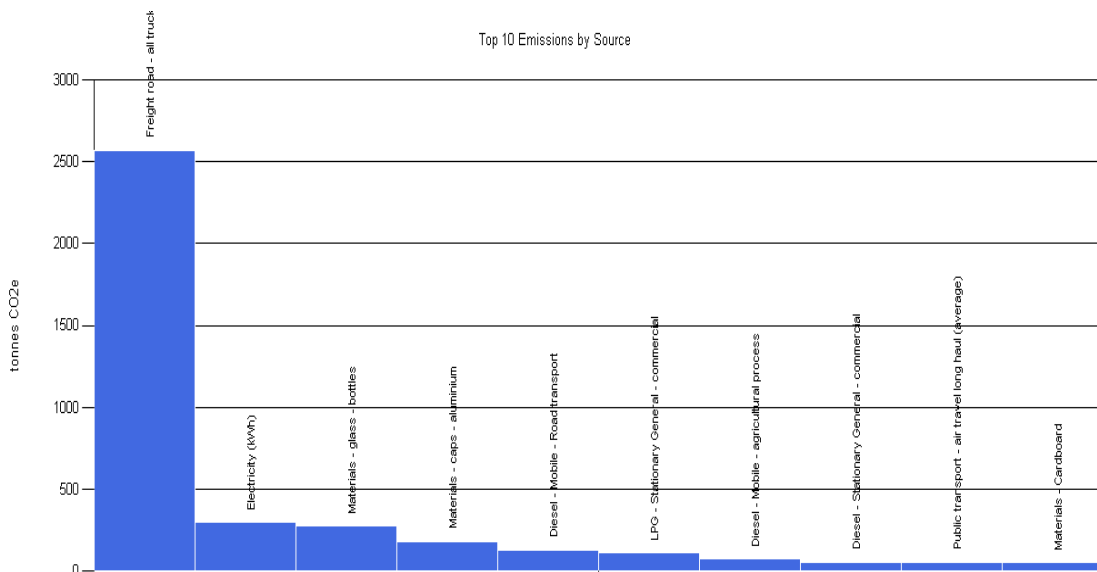

Consolidation approach – Operational control

Base year – 01/01/2010 to 31/12/2010

Measurement Period – 01/01/2010 to 31/12/2010

Emissions source inclusions – The diagram below shows the operational GHG emissions for Viña J. Bouchon by emissions source. Viña J. Bouchon’s total emissions for this period were **3910.04** tonnes carbon dioxide equivalents (CO₂e) comprising **400.26** tonnes CO₂e Scope 1, **297.30** tonnes CO₂e Scope 2 and **3212.49** tonnes CO₂e Scope 3 emissions.

Summary of CEMARS[®] certification:

VIÑA J. BOUCHON

Emissions source exclusions – To the development of this baseline is decided not to exclude any emissions sources, with the exception of maritime transport of final product from departure port to arrival port. This source can be excluded from the inventory because as evidence was provided to demonstrate that this is FOB and there is no operational control.

In future years is recommended to exclude the emission sources that represent less than 1% of the entire inventory provided that in total, they are not greater than 5% of the entire inventory.

Emissions reduction commitments – Viña J. Bouchon has developed a GHG emissions reduction plan. Some projects in this plan include:

- Freight Road Efficiency
- Energy Efficiency Program
- Reduction in Bottle Weight
- Change of Energy Source

Verified by – carboNZero Strategic Business Unit.

Threshold of materiality – Excluded emissions do not exceed 5% of the total footprint for organisation stated.

Level of assurance – Limited

Certification status – CEMARS certified “organisation” covering viticulture, winery, sales, marketing, administration, bottling and packaging.

Certificate number – 2011107J

Valid until – 30 April 2014
